Concept Note

ICT is an umbrella in this new mode of life. We know that in 21st century we need to grow core content knowledge, digital literacy and also we must need to cross disciplinary knowledge. The emotional or ethical value, cultural aspects and also the skills of job as well as the life we need through our knowledge. Not only this but also we need to create or invent something new or we need critical thinking, problem solving mentality some times by communication or collaboration.

The lockdown and online education system became personalized, web based, subject oriented formative evaluation system, collaborative, on-demand and sometimes global community meets here which is so new than previous system. We accept it. Now sometimes we can feel the positive side of it. It has a opposite side too. Specially, our economic ground of country is not support

this system in all class. Another problem is the eye contact with the student is very important for teachers to teach them. But we need to know the policy, the new aspect, the failure and the flourishing goal of this education system which we can know through Concrete experience, Reflective observation, Abstract of conceptualisation, Active experimentation. Presently our day to day life also dependent on Information and Communication Technology. We can see banking sector or our shopping method and many more. We have to learn all of these.

Therefore, Kolkata Society for Asian Studies is going to arrange a **FACULTY DEVELOPMENT PROGRAMME** to get a bigger knowledge on these matters from resource persons and to make a space for researcher to think over these and share.

Guest of Honour:

Special Guest:

Inaugural Session:

(05.03.2022, from 5.30 PM to 6.00 PM)
